

1. Write a program to reverse an integer in Python.
2. Write a program in Python to check whether an integer is an Armstrong number or not.
3. Write a program in Python to check if a given number is prime or not.
4. Write a program in Python to print the Fibonacci series using an iterative method.
5. Write a program in Python to print the Fibonacci series using a recursive method.
6. Write a program in Python to check whether a number is palindrome or not using an iterative method.
7. Write a program in Python to check whether a number is palindrome or not using a recursive method.
8. Write a program in Python to find the greatest among three integers.
9. Write a program in Python to check if a number is binary?
10. Write a program in Python to find the sum of digits of a number using recursion?
11. Write a program in Python to swap two numbers without using a third variable?
12. Write a program in Python to swap two numbers using a third variable?
13. Write a program in Python to find prime factors of a given integer.
14. Write a program in Python to add two integers without using arithmetic operators?
15. Write a program in Python to find if a given number is perfect or not?
16. Python Program to find the Average of numbers.
17. Python Program to calculate factorial using iterative method.
18. Python Program to calculate factorial using recursion
19. Python Program to check if a given number is even or odd.
20. Python program to print first n Prime Number with explanation.
21. Python Program to print Prime Number in a given range.
22. Python Program to find Smallest number among three.
23. Python Program to Convert Decimal Number into Binary.
24. Python Program to convert Decimal number to Octal number
25. Python Program to check if the given year is a leap year or not.
26. Python program to calculate Simple Interest.
27. Python program to remove given character from String.

28. Python Program to count occurrence of a given characters in string
29. Python Program to check if two Strings are Anagram.
30. Python program to check if a String is palindrome or not.
31. Python program to check given character is vowel or consonant
32. Python program to check if a given character is digit or not.
33. Python program to replace the string space with a given character.
34. Python program to convert lowercase char to uppercase of string.
35. Python program to convert lowercase vowel to uppercase in string.
36. Python program to delete vowels in a given string.
37. Python program to count the Occurrence Of Vowels & Consonants in a String.
38. Python program to print the highest frequency character in a String.
39. Python program to Replace First Occurrence Of Vowel With '-' in String.
40. Python program to count alphabets, digits and special characters.
41. Python program to separate characters in a given string.
42. Python program to remove blank space from string.
43. Python program to concatenate two strings using join() method.
44. Python program to concatenate two strings without using join() method.
45. Python program to remove repeated characters from string.
46. Python program to calculate sum of integers in string.
47. Python program to print all non repeating characters in string.
48. Python program to copy one string to another string.
49. Python Program to sort characters of string in ascending order.
50. Python Program to sort character of string in descending order.
